

ITB 21-EL-008
“WIRE AND CABLE PULLER/TENSIONER”

CITY OF MOUNT DORA

ADDENDUM #1

To All Plan Holders:

The following changes, clarification and additions are hereby made part of the **ITB #21-EL-008 “WIRE AND CABLE PULLER/TENSIONER”** for the above as fully and completely as if, the same were fully set forth therein.

~~~~~  
**PLEASE BE ADVISED OF THE FOLLOWING QUESTIONS AND ANSWERS:**

- Q1.** Our machine will have a pilot line system (spider rewind/level wind) installed. Just wanted to clarify if anything else is required on this spec. We do offer a separate pilot line system (Spider System, see attached spec sheet).
- A1.** There are no other items required.
- Q2.** Is this spec asking to include a reel with pilot rope installed?
- A2.** Yes, the trailer mounted spider system shall include a reel with 6000’ of rope, (S-85)
- Q3.** If so, does a pole mounted braking controller (Spider Braking Controller) also need to be included? Also how many sets of reels with pilot rope and braking controllers would be needed?
- A3.** This bid specification does not included the option for a pole mounted braking controller or pole mounted reels, however we wanted to insure the future brake control expansion capability is included with this unit.
